[Github](#) | [Medium](#) | [LinkedIn](#)

Full-stack software engineer experienced in Ruby on Rails and JavaScript based programming with a background in book publishing and television production. Fast learner, committed to creative problem solving and critical thinking. Extensive experience working across multiple group projects simultaneously. Excellent communication skills.

Passionate about data and thoughtful, user-friendly design.

### TECHNICAL SKILLS

JavaScript, React, Ruby, Rails, SQL, Redux, ActiveRecord, HTML/CSS, Semantic UI, Bootstrap, Git

### EDUCATION

**Flatiron School, New York, NY** June 2021

Full Stack Web Development, focusing on Ruby on Rails, JavaScript, and React

**Washington University in St. Louis** December 2015

Bachelor of Arts, Double major in English and Film Studies

College Honors, 3.67 GPA

### Honors and Awards

National Merit and National Hispanic Scholar

### TECHNICAL PROJECTS

**Day Tripper** - [Github](#) [frontend](#) | [backend](#) | [Demo](#)

A full stack React + Rails application that allows users to view and sort hiking trails based on different criteria

- Employed Cloudinary to allow users to upload photos from their hikes and user profile pictures
- Incorporated the Google Maps API to allow users to view trailheads and coordinates on an interactive map
- Integrated Bootstrap React and styled-components to create a visually coherent and engaging user experience
- Leveraged ActiveRecord data modeling to allow users to save hikes to a personal favorites list

**Fright Site** - [Github](#) [frontend](#) | [backend](#) | [Demo](#)

A full stack application that allows users to review various horror movies based on genre

- Developed with a JavaScript/React front-end and Ruby/Active Record back-end
- Communicated with the Movie Database API to retrieve information and visual assets for the movies
- Utilized JWT to store encrypted user information client-side and bcrypt for user authorization

**Season's Eatings** - [Github](#) [frontend](#) | [backend](#)

A recipe finder that organizes recipes based on seasonal produce

- Utilized ActiveRecord models to allow users to view seasonal recipes and add relevant produce to a shopping list
- Collaborated with a partner using Git branching to sustain an organized workflow

### WORK EXPERIENCE

**Penguin Random House**, New York, NY

*Editorial Assistant*

May 2019-March 2021

- Liaised between Editorial, Production, Publicity, Legal, and Marketing teams on 20 books over a two-year period
- Interfaced regularly with authors, answering questions and guiding them through the publication process
- Wrote copy for marketing and retail use

**A&E Networks - HISTORY**, New York, NY

*Programming Coordinator*

June 2017-May 2019

- Liaised with internal Legal, Scheduling, Marketing and Publicity departments on shows' statuses
- Communicated with many external production companies during production and post-production

*Scheduling Coordinator*

January 2017-May 2017

- Tracked competitive programming at external networks and kept the internal programming team abreast of trends
