SELECT PROFESSIONAL EXPERIENCE

iC-1 Solutions, *Full Stack Software Engineer*

Reston, VA (remote) | November 2021 to Present

- Developed a single page budget application for government client, building and maintaining 50+ complex features
- Collaborated with an agile team of 6 with an emphasis on testable and scalable code. Mentored new team members on project standards and best practices
- Communicated regularly with internal and client teams to understand functional goals and troubleshoot user issues, decreasing the need for reworking stories by 70%
- Analyzed performance issues and orchestrated solutions, some of which improved performance by over 80%
- Implemented first real time updates in the application leveraging Websockets + GraphQL subscriptions
- Wrote complex queries and user defined functions in SQL to implement business logic

Penguin Random House, *Editorial Assistant*

New York, NY | May 2019 - March 2021

- Liaised between Editorial, Production, Publicity, Legal, and Marketing teams on 20+ books over a two-year period
- Interfaced daily with authors, answering questions and guiding them through the publication process

A+E Networks, *Programming Coordinator*

New York, NY | January 2017 - May 2019

- Liaised with internal Legal, Marketing and Publicity teams for 15+ shows and specials
- Coordinated with over 30 external production companies during production and post-production to keep deliverables on schedule

---
